Dear Administrator

A couple important things:

Information
Please note, in a group setting individuals with “computer shyness” tend to have a higher failure rate of the demonstration portion of the test. It is not a big deal but an appointment to re-take the demonstration is required. As part of the exam each student must use the computer to demonstrate how to Stop, Slow, and Release traffic. This is a bit harder than it sounds if the student just observed. We strongly suggest that each student practice hands-on in the non-graded area. Practice Link.

Requirement
Complete form and email to, dpurcella@trafficgraphics.com
Important do not start the group class without confirmation from OnlineFlagger.com
The first student takes the normal test associated with course.
The remaining students are assigned a special status by OnlineFlagger.com
No students should login until we have confirmed your group status.
We handle these requests M-F during our Office hours

Please Provide
Administrator information

contact name: contact phone: contact email:
